

Provista's Pharmacy Benefits Manager Program *A Healthy Prescription for Savings*

Provista's mission is to provide significant savings to our members on everything they purchase using our contracts. Provista takes aggressive measures to help members reduce overall supply expenses and ensure that the value received from contracts remains best-in-class.

Provista employs a competitive contract process using purchasing scale and leverage to achieve stronger negotiation power on behalf of our members. Other benefits include:

- The greatest choice and value through the broadest, most competitive portfolio
- Quick and easy contract access, with voluntary commitment and no membership fees
- Provista's use of data-driven contracting decisions to define, enforce and monitor pricing throughout the term of a contract using price management strategies that focus on contract and supplier performance

Provista delivers significant savings on PBM solutions and provides the contracting expertise to help members nationwide improve their daily operations.

Delivering Savings on PBM Solutions

Provista combines the power of the nation's most competitive portfolio with unmatched contracting service expertise to bring members supply chain improvement solutions to advance their daily operations.

Provista is a leading supply chain improvement company that provides group purchasing and business solutions to more than 15,000 health care organizations, colleges, universities, schools and corporations across the country. We understand human resources and pharmacy benefits coverages are a large expense for our members, and we have solutions to help reduce these costs. Provista has partnered with a leading Pharmacy Benefits Manager (PBM) to provide our members savings and value on PBM services.

About our PBM Partner

Medco Health Solutions is a leading health care company. As the world’s most advanced pharmacy, Medco provides clinically-driven pharmacy benefit services designed to improve the quality of care and lower total health care costs for clients and their plan members. Through its unique Therapeutic Resource Centers®, Medco is providing personalized care for those patients who need it most—the chronic and complex patients that drive the majority of a plan’s drug costs and about 75% of medical spend. Medco currently provides prescription drug benefits to 1 in 5 Americans.

What is a PBM?

A Pharmacy Benefits Manager (PBM) contracts with pharmacies on their clients’ behalf for prescriptions. A PBM handles the processing and payment of drug claims, as well as develops and maintains the formulary, negotiates discounts and rebates, and manages clinical programs. In addition, a PBM provides a number of additional services, including:

- National Pharmacy Networks
- Discounted Costs for Prescriptions
- Customer Service
- Account Management
- Clinical Guidance
- Mail Order Pharmacy

The Provista Advantage

When you partner with Provista for your organization’s pharmacy benefits management needs, you are partnering with the best. Our competitive contract offers aggressive pharmacy discounts and a transparent pricing structure you can feel confident about. Provista’s PBM program is structured to lower your company’s drug costs considerably, while allowing you to maintain control of your program. In addition, Provista’s PBM program offers:

- Leveraged pricing based on more than 15,000 employer groups
- Independent oversight by industry experts
- Random auditing
- Financial and clinical modeling
- Performance guarantees
- 100% of manufacturer rebates available
- Ability to keep your current broker, if desired
- Flexible benefit plan design options

Easy Implementation

It's as easy as 1-2-3 to get started with Provista's PBM Solution.

Submit PBM Data

To get started, we will need some basic data on your current PBM solution.

A Thorough Diagnosis

We will use the data to conduct an analysis of your current PBM and identify savings opportunities.

Your Prescription for Savings

Our PBM implementation team will present savings results and recommendations.
